**Response to Instruction and intervention (RTIi) Update**

**NO ACTION REQUIRED**

**Background/Summary**

North Bend School District has partnered with ORTI beginning in 2006 to strengthen literacy systems through a structured Response to Intervention framework. In 2023–24, the district launched an intentional “ORTIi Reboot,” prioritizing strong Tier 1 core instruction grounded in the Science of Reading. This work centers on the belief that effective, aligned classroom instruction is the foundation for student success.

Over the past two years, the district has aligned K–5 literacy practices through implementation of ECRI routines, development of Elementary Reading Standards of Practice, sustained professional development, and strengthened district and building leadership teams. Through strengthened core review processes and intentional use of data, the district has increased alignment across schools and accelerated student reading growth.

The next phase of implementation will continue refining Tier 1 practices while strengthening Tier 2 and 3 systems in 2025–26.

Tonight our fantastic literacy coaches, Heather Flammang and Leah Johnson will present to you an overview of the RTIi process.
