The table above illustrates the enrollment of the Denton Independent School District for the period between the 2005-2006 school year and the 2010-2011 school year. In addition, the table and graph illustrates the number of discipline assignments removing a student from the regular instructional setting to a disciplinary instructional setting. The graph indicates a decrease in the amount of incidents resulting in a student being removed from the regular instructional setting while at the same time the enrollment of the Denton ISD is increasing.
