<b>September 2019</b>	
10th	Design Team Meeting for Kazen Choice Academy, 3:45 - 4:15 pm
11th	Kazen Academy Site Visits of Existing SSAISD MS Choice Academies and Selection of Design Team Members
	Survey's to all 3rd - 5th Grade Families at campus Open Houses/Parent Nights
18th	Design Team Meeting for Kazen Choice Academy, 3:45 - 4:15 pm
<b>October 2019</b>	
14th	Design Team Meeting for Kazen Choice Academy, 4-5:30pm
16th	Board Presentation of Academy of Choice Academic Focus for Kazen

In the new Choice Academy at Kazen, students will have access to core classes (language arts, math, science, and social studies). We also want to provide opportunities for students to explore areas of interest. Currently, South San Antonio ISD provides three Choice Academies in the areas of STEM (Science, Technology, Engineering and Math), Fine Arts, and Health Science at the middle school level. The 4th Choice Academy will be developed based on community input. Please choose up to three (3) middle school choice programs your student(s) would be interested in for middle school. Please mark your First Choice below: \*

*Mark only one oval.*

AGRICULTURE AND HORTICULTURE: Explore Agriculture and Horticulture through hands-on experience in: small and large animal science, wildlife management, veterinary medicine, landscaping and nursery, floral design, horticulture and much more.

ARCHITECTURE AND CONSTRUCTION: Students will be creative and learn to design and build things using technology and tools while enjoying the Architecture and Construction program. Architecture and construction is becoming more specialized to meet the needs of the progressive construction industry, including new building methods and materials. Students will learn general construction concepts, as well as valuable skills with construction tools and machinery, through hands on projects.

AUDIO/VIDEO PRODUCTION: Students who have a creative talent for production or a personality for being on television or radio will find this program to be a perfect fit. Through this program, students can explore the world of television, radio, audio recording, computer animation, lighting, and set design, while gaining real-world experience in broadcast journalism, sports broadcasting and audio/video production.

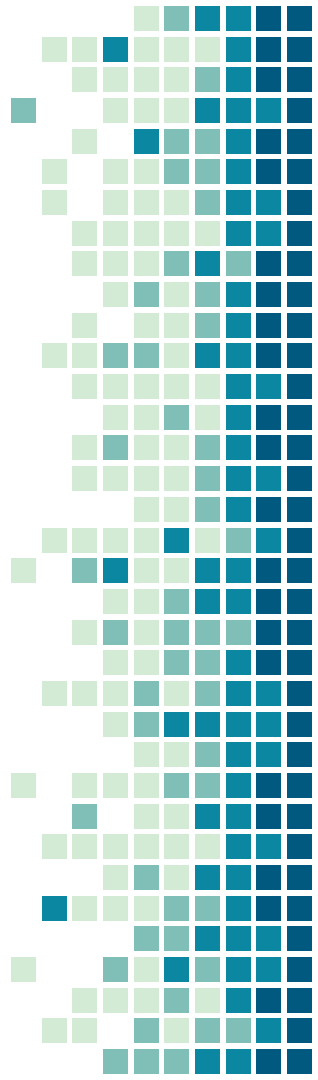

BUSINESS ACADEMY: Students will have a learning experience where curriculum is infused with subjects related to business, economics, and financial literacy. Relating academic subjects to the business world will help our students build a better future and encourage "young executives" to one day help support the economic well-being of our community.

CYBER-SECURITY: Students will participate in a learning environment that has a focus on preparing students with the skills, credentials and an industry-specific associate degree necessary for high-wage, high-demand careers in cybersecurity.

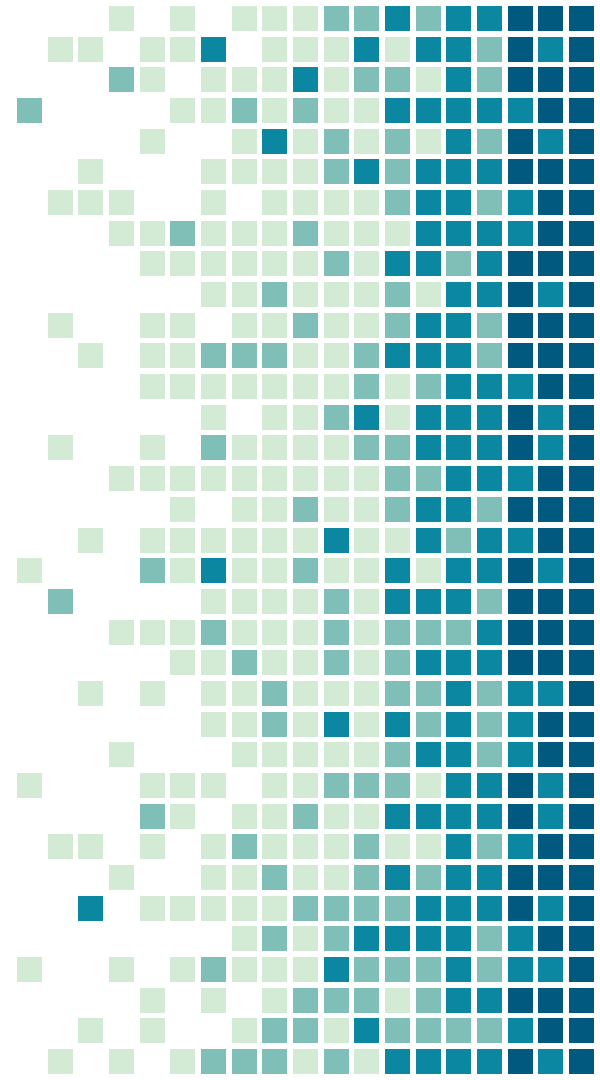

LAW ACADEMY: Students will develop and demonstrate the academic and social skills necessary to be college and workforce ready. The law academy provides opportunities for eligible students to learn about the legal profession and interact with persons from law-related fields.

LEADERSHIP: Students at the leadership academy learn to communicate effectively, collaborate, make decisions and motivate others. They will also participate in service learning.

TWO WAY DUAL LANGUAGE: Dual Language Academy will prepare students to meet the challenges of an interdependent world community by providing a bilingual and multicultural learning environment through immersion that enables participants to communicate in another language, master all curricular subjects, and develop intercultural understanding and respect.
