Essential Action	1.1 Develop campus instructional leaders with clear roles and responsibilities.	4.1 Curriculum and assessments aligned to TEKS with a year-long scope and sequence.	5.3 Data-driven instruction.
Rationale	The district recognizes that the leaders of a campus must have clear roles and responsibilities and must be trained in effective schoolwide systems implementation and in curriculum and instruction in order to lead the campus. The campus leader is being trained by Relay as part of a district-wide initiative.	The campus utilizes the TEKS Resource System to inform the year long scope and sequence for curriculum and assessment implementation	The campus is implementing the Data Driven Instruction process during PLCs to inform instructional practices.
Desired Annual Outcome	The desired outcome is to create leadership capacity in campus leaders in order to influence and execute systems. Also train principals to become more versed and knowledgeable about curriculum and instruction.	The desired outcome is for teachers to increase their knowledge of the standards to improve the quality of lesson planning and instructional delivery.	The desired outcome is for leaders and teachers to perform the data driven instruction process during PLCs in order to become more knowledgeable about standards and skills required to increase teacher effectiveness and student academic growth.
Barriers to Address During the Year	Barriers during the year include time constraints and access to more highly qualified teaching staff.	Barriers during the year include time constraints and capacity of teaching staff.	Barriers include establishing a system to monitor the DDI and PLC processes and assess the capacity of teachers to use what they are learning and utilize it for lesson planning and direct teaching.
District Commitment Theory of Action:		If the campus develops effective instructional leadership with clear roles and responsibilities and establishes curriculum and assessments aligned with TEKS with a year long scope and sequence and develops capacity of teachers through data driven instruction, then students will show growth in their learning and show an increase in meeting STAAR standards.
