## **Secondary ELA Curriculum**

We conducted a curriculum review and have determined to pilot McGraw Hill's Study Sync in grades 6-12. This curriculum is in continuation to the elementary curriculum purchased this year. The pilot allows us to try the curriculum for the remainder of the year to see if it will be a good fit for our teachers and students.

## **PBIS SET Visits**

Boise State, in coordination with the Rural School Research Grant, will be sending out evaluators to once again review our implementation status as buildings and a district. This process takes place annually for the duration of the grant. This will be our second time completing the school-wide evaluation tool (SET).
