Re: Request for Proposals

Northern Winds Recovery Center (NWRC) provides Drug and Alcohol Testing. NWRC is a CLIA certified laboratory (Certificate available upon request). NWRC staff are all certified in Specimen Collection (A copy of certification is available upon request) as well as trained in Direct Observation Procedures. The cost of testing is based on the current utilization of one test per year. However, cost can be adjusted based on the number of tests needed.

The cost includes specimen collection devices, testing devices, and observation of collection. All positive results will be verified by a Medical Review Officer. Confirmation by the Medical Review Officer eliminates false positives. Observation of collection ensures the integrity of each test and result.

The cost of testing includes a database of students and randomization as needed.

Cost of Testing

Student Activities Drug/Alcohol Testing:

| | |
|-------------------------------------|-------------------|
| Test Collection | \$ 14.50/per test |
| Medical Review Officer Confirmation | \$ 50.00/per test |

NWRC would like the opportunity to provide this service to our school system and community. If you have any questions, please do not hesitate to contact me.

Sincerely,

Crystal Evans, PhD
Executive Director
