Regular Called Board Meeting

CONSENT: Item #6

Approval of Security Camera Installations

Request: *After this item is approved, what campuses will still need camera installation according to the plan? Since the camera installation at SSHS has been completed, are all the cameras operational? The agenda item caption differs from the Agenda Item Summary sheet, therefore, can we assume, that only the middle schools are being equipped?*

Response:

All high school cameras are working. After the Board approves this installation at the middle schools, all middle schools will have working cameras and that part of the project will be complete. What will remain will be the installation of security cameras at the elementary schools. There is about \$31,000 left in this year's security camera budget and we will begin the installation of security cameras at the elementary level this spring. The remaining elementary schools will need to be budgeted in next year's budget.
