November 2025–District Technology Update
November Update

The November update is much the same as the past few months. We haven't had a chance to meet together for connected seniors this month but we do have plans for next month to talk.

We were able to look at the intercoms for the high school and get into contact with Smeed Communications. With that we were able to get the rooms in the north hall added back into the PA system for the high school. The three Intercoms we need to look at and evaluate are the Boys and Girls locker room and the Gym.

We have been working with the Family Academy to make sure that they have the resources they need to continue functioning and fulfilling their responsibilities as best as they can technology wise. There were a few weeks where we were unable to provide chromebooks to the students that were asking for them but as of right now we have gotten a new shipment of chromebook, fulfilled the request and are also ready to provide Kate with any new influx of requests. We are also doing our best to keep up with parents' needs application wise and are also looking at options that might be better for the younger students (providing a tablet maybe over a chromebook for certain things that don't run and the chromebooks).

Projects
Chromebooks set up for Family Academy

Ongoing Projects
Inventory - Deprovisioning Chromebooks & Rotating in new Chromebooks
Updating/Distributing Teachers Laptops
Working on continuing blocking AI in classroom settings
Updating Web Filtering Policies on Chromebooks/Workstations
Documentation
Microsoft 365 implementation
