|  |  |  | Net Cost |  | 14,034,015 |  |  |  |
|  |  |  | AIC as of Jan 9 |  | 4.29\% |  |  |  |

Does not contemplate surplus budgets FY2014 or thereafter. Levy Year 11-15 abatements estimated at $\$ 14,146,467$. Refunding bonds issued in FY2015 to flatten remaining levy payments.

## I-A: Abatements FY11-FY13 Plus Refunding to Flatten Debt

Advantages:
Flattens debt service payments for the life of the bond issue

- Does not rely on abatements of surplus after FY13

Disadvantages:
Extends debt service for three years after final maturity

- Total net debt service cost from
refunding estimated at $\$ 14,034,015$ and present value cost of $\$ 2,321,723$
- Future interest rate risk

|  |  |  |  |  |  |  |  |  |  | Total Abatements | (38,487,150) |  |  |  |

Uses estimated surplus budgets FY2011-FY2019. Total abatements estimated at \$38,487,150.

## II: Abatements FY11-FY19

Advantages:
Flattens debt service payments for the life of the bond issue through life of the bonds without the cost of refunding

Depending on economy and future tax base growth may not need future refunding issues

Disadvantages:
Depends on education fund surpluses for the next six years.

## Options III: Combo of Abatement/Defeasance 2018

- Options III is a combination of abatements/cash defeasance
- Using cash to pay-off or defease bonds works best on the bond call date. The next call date is for the Series 2007A bonds January 1, 2017 and for the Series 2008 bonds January 1, 2018
- Option III shows continuing abatements through FY2017. The cash surplus generated in FY2018 and FY2019 (prospectively) is used to pay down principal in order to flatten the debt service payments in Fall of 2018.
- Waiting until 2018 helps minimize the refunding of non-callable bonds. Market and economic conditions at the time will also dictate the timing.
- In this option, the debt service is not extended

## III: Abatements FY11-FY17-Defeasance to Flatten Debt Service in Fall 2018

|  |  |  |  |  |  | Total for | Debt Payoff FY18 +19 | (9,884,936) |  | Net Cost/(Savings) | $(1,109,382)$ |  |  |
|  |  |  |  |  |  |  | Total Abatements | $(28,602,214)$ |  | AIC as of Jan 9 | 0.00\% |  |  |

FY2011-2017 abatements estimated at \$28,602,214.
The projected cash surplus from FY18 and FY19 operations \$9,884,936 is used in Fall 2018 to flatten remaining levy payments.

## III: Abatements FY11-FY17-Defeasance to Flatten Debt Servic in Fall 2018

## Advantages:

Flattens debt service payments for the life of the bond issues

- Uses FY 2018 and FY2019 cash surplus to pay down and flatten remaining debt payments
- Allows use of FY2020 and forward surpluses, if any, which are not pledged to debt service
- No Bonds are issued so no associated costs

Disadvantages:

- Uses FY2019 projected surplus before it is fully realized
- Relies on operating tax levy funds to reduce debt service.

## Options IV: Combo of Abatement/Refunding/Defeasance To Lower Debt Service to \$17M

- Options IV is a combination of abatements/cash defeasance/ refunding
- Using cash to pay-off or defease bonds works best on the bond call date. The next call date is for the Series 2007A bonds January 1, 2017 and for the Series 2008 bonds January 1, 2018
- Option IV shows continuing abatements through FY2016. The cash surplus generated partially in FY 2016 and total in FY2017 and FY2018, FY2019 (prospectively) is used to pay down principal in order to flatten the debt service payments to $\$ 17 \mathrm{M}$ annually in Fall of 2017.
- In this option, the debt service is extended 2 years.

## IV: Abatements FY11-FY16-Defeasance/Refunding to Flatten Debt Service in 2017

|  |  |  |  |  |  |  |  | (22,449,715) | AIC as of Jan 9 |  | 3.72\% |  |  |

FY2011-2016 abatements estimated at \$22,449,715.
The projected cash surplus from FY16 - FY19 operations $\$ 16,037,435$ is used in Fall 2017 to flatten remaining levy payments.

## IV: Abatements FY11-FY16-Defeasance/Refunding to Flatten Debt Service in 2017

Advantages:
Flattens debt service payments for the life of the bond issues to $\mathbf{\$ 1 7 M}$

- Uses a portion of FY16 and all of FY17, FY18 andFY19 cash surpluses to pay down and flatten remaining debt payments

Allows use of FY2020 and forward surpluses, if any, which are not pledged to debt service

Disadvantages:

- Uses FY18 and FY19 projected surplus before it is fully realized
- Extends debt service payments by two years
- Total cost is $\$ 4.09 \mathrm{M}$ and present value cost is $\$ 678,000$
- Relies on operating tax levy funds to reduce debt service

Abatement and Refunding Options to Level Debt Payments (Current Projection with Additional Surplus in FY2014)

## District Strategy to Abate Ed Fund Surplus > \$15M Balance

Current Abatement Strategy: When surplus occurs in Education Fund, District abates amounts in excess of \$15M minimum the following Fiscal Year.

## Options IV: Combo of Abatement/Refunding/Defeasance To Lower Debt Service to \$17M

- Options IV is a combination of abatements/cash defeasance/ refunding
- Using cash to pay-off or defease bonds works best on the bond call date. The next call date is for the Series 2007A bonds January 1, 2017 and for the Series 2008 bonds January 1, 2018
- Option IV shows continuing abatements through FY2016. The cash surplus generated partially in FY 2016 and total in FY2017 and FY2018, FY2019 (prospectively) is used to pay down principal in order to flatten the debt service payments to $\$ 17 \mathrm{M}$ annually in Fall of 2017.
- In this option, the debt service is extended 2 years.

FY2011-2016 abatements estimated at \$22,449,715.
The projected cash surplus from FY16 - FY19 operations \$18,037,435 is used in Fall 2017 to flatten remaining levy payments.

## IV: Abatements FY11-FY16-Defeasance/Refunding to Flatten Debt Service in 2017

## Advantages:

Flattens debt service payments for the life of the bond issues to $\mathbf{\$ 1 7 M}$

- Uses a portion of FY16 and all of FY17, FY18 andFY19 cash surpluses to pay down and flatten remaining debt payments

Allows use of FY2020 and forward surpluses, if any, which are not pledged to debt service

Disadvantages:
Uses FY18 and FY19 projected surplus before it is fully realized

- Extends debt service payments by two years
- Total cost is $\$ 2.9 \mathrm{M}$ and present value cost is \$545,000
- Relies on operating tax levy funds to reduce debt service
