

## Board of Trustees Agenda Item

**Staff Member Name:**

Scott Warstler

**Department:**

Operations

**Board Meeting Date:**

September 15, 2025

**Agenda Heading:**

Act on approval of standard construction delivery methods

**Item Type:** Action Item

**Background Information:**

Board Policy CV requires the Board to approve the delivery method for construction projects. Usually, the same delivery method is used for similar construction project types. As a result, the District recommends that the Board pre-approve the use of construction methods for certain project types, expediting the process for construction projects.

If the District recommends a construction method other than the one pre-approved for a project type, the recommendation will be brought to the Board for approval.

Administration makes this recommendation annually. This pre-approval will remain applicable through September 2026.

**Amount (when applicable):** N/A

**Recommendation:**

We recommend a motion to approve the standard use of delivery methods for construction projects, as presented.

**Comments:**

Recommended delivery methods are the same as those that were in place last year
