

Board of Education

ACTION

TITLE: Consider Approval of Phases for PEAK Site Improvements

DATE: April 24, 2023

RESPONSIBLE ADMINISTRATOR: Shawn Shaffer
Executive Director of Facility Operations

Joseph Velasquez
Construction Project Manager

BACKGROUND/CONSIDERATIONS:

The design of PEAK Innovation Center's Drainage and Site Improvements has neared its completion and the final design has received its final estimate from CMAR. A phasing plan has been prepared and will be presented to decide what phases should be released to start for construction.

RECOMMENDATION:

The administration recommends moving forward with all phases to complete the overall site at PEAK. If the Board agrees, the motion would read: ***move to proceed with construction of all phases of the PEAK Drainage and Site Improvements project.***
