RE: Joyner Playground Proposal

For your consideration and approval, I am submitting a proposed layout for playground equipment at Joyner Elementary. The equipment shown as "existing equipment" is currently located on the north side of the building, but must be relocated prior to construction of the new classrooms. The other equipment has been planned by the PTO for purchase with funds they have raised. The layout shows the equipment to be located behind the main building in the grass area between the media center and the cafeteria. This space is currently not used and would allow easy access to both the Discovery Garden and the activity building.
