Technology Report

For the February 2017 School Board

The QISD Technology director responded to 41 calls for assistance since the last board meeting. I installed the January software maintenance release to all 80 of our wireless access points, installed windows updates to our Windows servers and upgraded our apple server to the latest OS that was released just last Monday. On January 18th, I attended the Region 9 monthly technology directors meeting. We have started a major upgrade to the IP security cameras, replacing the original cameras with a newer generation which will provide better video from outside the school campuses and also inside hallways with 4x more resolution for better quality and low-light images. Outside campus lightning is also being upgraded to provide better quality video at night.
