No Action Required

---

Presently, grade advancement testing is required for students in grades 5 and 8; however, performance standards for grades 3 through 8 will not be established until the fall of 2012. The Student Success Initiative (SSI) promotion requirement will not include use of the STAAR results in the 2011-2012 school year only.

We are requesting the suspension of EIE Local requiring students to pass the grade 5 and 8 assessments and consider adopting a resolution for the 2011-2012 school year. This change will prevent the need to revise this policy twice – once to remove the provision and a second time to bring it back for the 2012-2013 school year.
