Re: Approve Change Order to Video System Installation

Recommendation:

It is the recommendation of the Superintendent to approve a change order to the video system installation at a cost of \$4,945.87.

Background Information:

In the process of installing the video security system, Imperial Surveillance has discovered that some of the wiring runs exceed the 300 foot limit for effective operation. Imperial, Net56, and the district have worked through a variety of potential solutions. The best solution operationally is to create a new internet switch near the gymnasium for these extended runs. We would be able to repurpose one of our current switches for this process, but will need to run new wiring, build a rack system, and provide backup support. This change order will accomplish this necessary adjustment.
