

Beeville ISD 2008-2009 Board GOALS

Success for ALL students through rigor, relevance and relationships

Success will be measured by:

- All scores for the state accountability will be at or above the state level
- Increase the number of campuses at the recognized or exemplary levels
- A decrease in the number of campuses that did not meet AYP
- An increase in the graduation rate
- An increase in dual credit and AP success rate as compared to the State average or better*

The Strategy Areas:

- Rigors and Relevant Curriculum and Teaching
 1. Research and identify best practices, in service center and elsewhere, for rigorous and relevant teaching and learning that advances high expectations and meets the individual needs of students. Document the way BISD supported teachers and staff in implementing these practices with their students.
- Relationships
 1. Document ways we have strengthen and expanded professionalism in our staff
 2. Document where our alumni are for at least four years after graduation**
 3. Document ways BISD has maximized the relationships students have with the staff and that schools have with the home and community

*The process to improve this would include researching best practices from other successful schools

**The process to track the progress for our graduates will use a combination of the system we developed for Spring of 2007 and the Nat. Clearinghouse information accessed by social security number with assistance from CBC.
