"The Texas Education Agency on-site review team learned that the district's Career and Technical Education (CTE) program is broad in scope and well organized, with many opportunities throughout the cluster's offered for extended learning. The TEA team investigation revealed that the district offered coherent sequence of courses in all Achieve Texas clusters recommended by the state. The team discovered that there are three CTE magnet programs and that the district has Tech Prep articulation agreements with four higher education institutions. The Agency team further learned that the CTE and bilingual education/English as a second language (BE-ESL) departments are working collaboratively to improve student performance as measured by TAKS. The TEA team found that the school district was implementing the required activities included in the 2006-2007 BE-ESL on-site report."
