**RE: Provision and installation of a 'single channel' Telecor XL Intercom and paging system for Horizon Harlingen Campus**

**Scope of work:** Provision and installation of a single channel Telecor XL intercom and paging system. This system will be able to provide occupant communication and sound distribution. This system would consist of call buttons in every classroom, speakers throughout the facility, four (4) loud speakers at the rear of the building facing the pavilion (as requested) and capable of providing can provide bell schedules. Please note: there were no clocks priced in this proposal.

Telecor XL systems provide centralized operations including, Intercom, Paging, and Audio Program Distribution to single building or multiple building facilities. In addition, an integral master clock transmits time tone signaling for class changes and synchronizes the facilities clocks. This system is upgradable, expandable and can be integrated with other existing system such as CCTV, access control, fire alarm etc. (if specified and requested).

**The price to accomplish the scope of work is \$17,000.00 which includes equipment (\$11,034.00), labor (\$5,966.00), and does NOT include Texas State Sales Tax.** Our payment term half down and the balance due immediately upon completion.

***The system is manufactured by Telecor and is covered by the manufacturer's 12-month warranty and we provide the same warranty on our installation labor. Please Note our installation labor warranty does not address the labor to remove and replace defective equipment.***
