

CenterPoint Energy Foundation Grant Award to the Goose Creek CISD Education Foundation

We are pleased to announce that the Goose Creek CISD Education Foundation has been awarded a \$10,000 grant from the CenterPoint Energy Foundation in support of the STEM Academy Robotics Program.

As a 501(c)(3) nonprofit organization, the Education Foundation partners with the community to provide resources that enrich teaching, inspire learning, and create opportunities for excellence in education for all Goose Creek CISD students. The Foundation will transfer these funds to the district for implementation of the STEM Academy Robotics Program, which will enhance hands-on learning opportunities and further develop students' skills in science, technology, engineering, and mathematics.

We would like to extend special recognition to Leia Miller, who served as the point person for this opportunity and led the charge in securing this funding. Her leadership and collaboration were instrumental in bringing this grant to fruition.

We are grateful to the CenterPoint Energy Foundation for their continued investment in education and for supporting innovation and excellence in our schools.
