

**School Board Meeting:**

April 12, 2010

**Subject:**

Online Learning Feasibility Report

**Presenter:**

Pam Miller and Micah Morris

---

**SUGGESTED SCHOOL BOARD ACTION:**

Report only.

**DESCRIPTION:**

Online learning opportunities for students in education are growing at a rapid pace around the state and around the country, but our district has not yet entered into providing any choices for students in this arena. Last year, Micah Morris, secondary science teacher, wrote an exemplary grant to create an online course for students in our district. Instead of approving his grant application, he was asked to put a team of secondary teachers from the middle school and high school together to explore online learning options and develop recommendations for our district to move forward. This report is attached, and at Monday's workshop, Micah will be present to outline the highlights of their findings and engage in discussion with you about possible avenues for us to explore into the future with online learning.
