

NKN Robotics 2024-2025

FIRST Tech Challenge Team #14687

Why is Robotics important?

“Robotics does in fact help with college, this is an autonomous robot designed to reorient itself on a raised track using a color sensor.”

~Mars Rombach
NKN Class of 2024
Freshman at Embry-
Riddle Aeronautical
University.

Summer Camp 2024

Nine students
created a
robot to sift
sand for
microplastics.

Sponsored by:
NWRESD STEMhub,
Tillamook Cheese Factory,
Rockaway Public Works,
and the Eugene Schmuck Foundation

FTC 2024-2025 “Into the Deep”

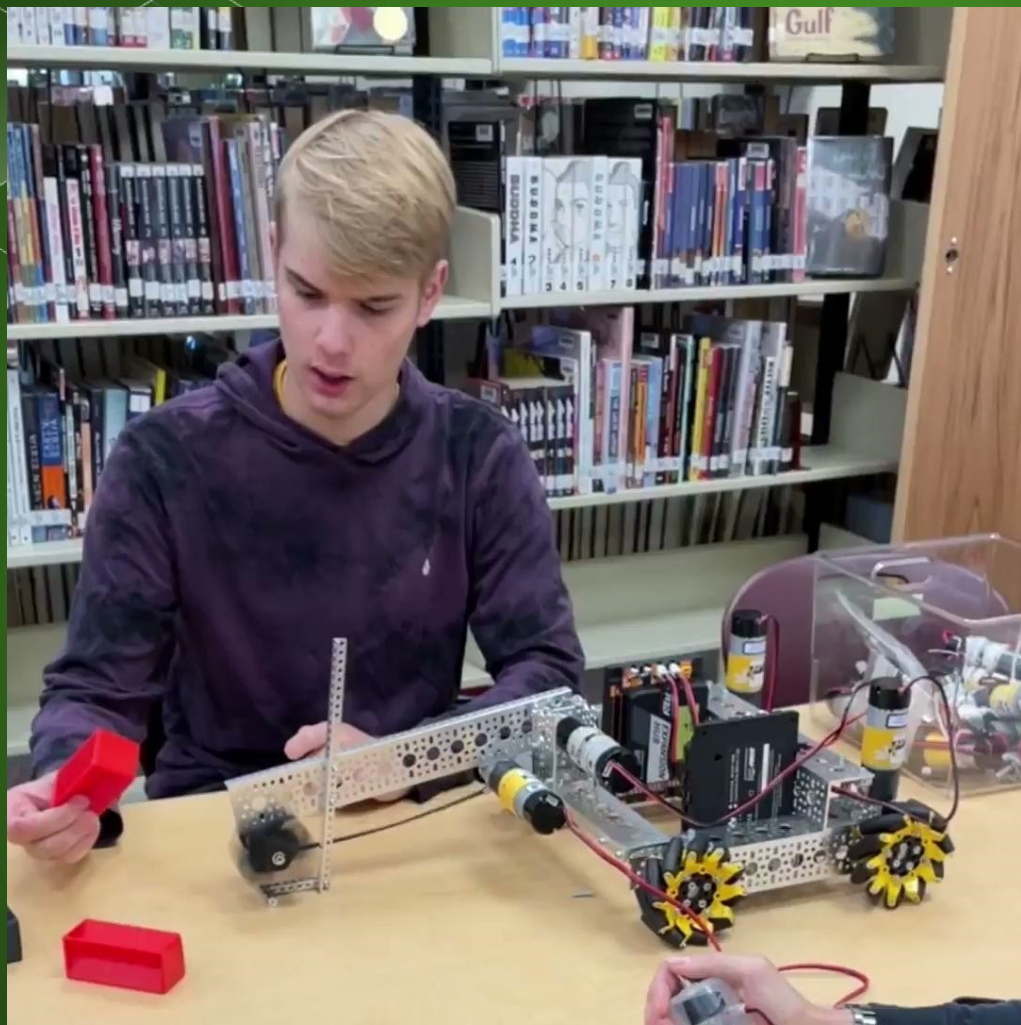

Meet 0 -
Hillsboro High
School - Oct. 26th

We have a great group of dedicated Middle and High School students this year.

Sponsored by:
Mudd Nick Foundation, ORTOP,
Tillamook Cheese Factory,
and the Eugene Schmuck Foundation

Initial Grabber Design

Volunteer of the month –David Hummel

NKN Robotics is extremely lucky to have mentor David Hummel volunteering for our team. David's passion for programming and robotics is contagious. He researches new technologies for our robot to give us a competitive advantage, and encourages students to attempt challenges that they hadn't even considered trying.

Every team he assists is greatly improved by his presence, and he has had a sizable influence on the structure of our team, and on the ambition of our design solutions.
Thank you David!
