About Your Statement

Interest on purchases - interest is calculated on all purchases and fees from the date they are posted to your account. However, if payment in full is received by the payment due date, no interest is charged. If you do not pay your account in full by your payment due date, interest accrues until the date the balance is paid in full. Once your balance is paid in full, residual interest will appear on the following month's statement. The residual interest charge represents the period from your statement date until the date the full payment was credited to your account.

Interest on cash advances - we charge interest on a cash advance from the date of the advance until the cash advance is paid in full.

How we apply payments to your account - we apply payments to items in your account in this order: interest on cash advances; interest on purchases; annual fees/transaction fee/other fees; cash advances on a previous statement; purchases on a previous statement; cash advances on the current statement; purchases on the current statement. We then apply any additional payments to items that have not yet appeared on your statement- but have been applied to your account- in the same order.

Foreign currency transactions are converted to your card's currency using a MasterCard conversion rate in effect on the day the transaction is posted to your account. The MasterCard conversion rate is the rate that we pay to MasterCard International Inc. plus a markup percentage that we disclose from time to time. This rate may not be the same as the rate that existed on the date the transaction was made. However, if a foreign currency transaction is refunded to your account, the MasterCard conversion rate used to convert your refund to your card's currency is the rate that we pay to MasterCard International Inc. minus the markup percentage that we disclose from time to time. This rate may not be the same as the rate that existed on the date the transaction was refunded. For these reasons, the amount that is credited to your account for a refund of a foreign currency transaction will, in most cases, be less than the amount that was originally charged to your account for that transaction.
