

# Technology Dept Report

December 12, 2016

## Classroom Technology

- We have made the system way better than it was, but still have some issues usually in the afternoon. We are planning on replacing the Wi-Fi access points at Minico with
- E-Rate funds as soon as they are approved. This will definitely help in tracking the traffic that is being used. Right now I can only get details two hours after it has occurred. The Wi-Fi at Minico and Mt. Harrison are currently managed by the state.

## Security/Video

- We have ordered the new servers for Paul and Acequia. We are just waiting for a final price on replacing all the non-functioning cameras at Minico and Mt. Harrison and will get those replaced as soon as the vender can replace them.

## Online Registration

- We are working on a new student registration form that will allow a brand new student to fill out all the necessary paper work online without the need to come to the school. Because of the non-stop work orders that keep being submitted, this project has been put at a lower priority for the time being.

## Work Orders

- Work orders are still coming in fast and numerous as schools are trying to implement several new programs and devices.

## Work Orders
