March 2017

E-rate

The past months phone bills have looked a little better with our e-rate monies applied. We will continue monitoring to make sure everything is properly applied.

Security Cameras

All our cameras working around the district. We are now fielding the requests for additional camera coverage. We'll be putting together a plan to purchase and install cameras.

META Conference

The META conference had a heavy emphasis on security on our networks. The good news is we are ahead of the bell curve in much of what we already do. But... as always like any network, security is an ongoing concern and we will be investigating some of those services that work on our network over the summer.
