

## **Executive Summary: Health & Life Safety Amendments (HLS)**

The purpose of this summary is to request formal Board approval for the Health and Life Safety amendments associated with the 2026 Exterior and Interior Door Replacement Project. These amendments are a result of the Ten-Year Safety Survey Reports conducted for Monroe Center Grade School, Meridian Junior High School, and Stillman Valley High School.

### **Project Overview**

To maintain compliance with the 23 Illinois Administrative Code 180, the district's architect, George Prosiliakos of Green Associates Architects Inc., has completed the required safety surveys. The surveys identified necessary door replacements to ensure the continued safety and security of students and staff across the following facilities:

- Monroe Center Grade School
- Meridian Junior High School
- Stillman Valley High School

### **Key Details from Safety Surveys**

The following information was certified by the district's licensed architect on October 24, 2025:

- Architect/Firm: George Prosiliakos (License #001-016815), Green Associates Architects Inc..
- Survey Year: 2025.
- Compliance Status: The reports were filed as an "Application for Approval," a necessary step when a building requires specific improvements to remain in full compliance with state safety codes.

### **Recommendation**

It is recommended that the Board of Education consider the approval of the HLS Amendment applications for MCGS, MJHS, and SVHS. This approval allows the district to proceed with the door replacement project, ensuring the facilities meet Illinois State Board of Education (ISBE) safety requirements and avoiding any penalties associated with incomplete safety reports.
