

In the upper left part of this report, averages are printed for the tests, totals, or composite. Several types of scores are reported, including the national percentile rank (NPR), which is the percent of students in this grade in the nation with a lower score on that test, total, or composite.

The graph to the right of the scores provides a visual display of the performance of the building for each test relative to other test areas. The NPRs for the various scores are displayed in horizontal bars. The varying lengths of these bars permit identification of the stronger and weaker areas of achievement for this building.

The lower part of the report provides detailed information about skills in each test. The number of items for each skill, the average number attempted, the average percent correct for the building, and the average percent correct for students in this grade in the nation are reported. The difference between the percent correct for the building and the percent correct for students in the nation is displayed as a horizontal bar. These bars permit identification of skills that stand out as high or low when compared with similar groups in the nation.

ELEMENTARY**

In the upper left part of this report, averages are printed for the tests, totals, or composite. Several types of scores are reported, including the national percentile rank (NPR), which is the percent of students in this grade in the nation with a lower score on that test, total, or composite.

The graph to the right of the scores provides a visual display of the performance of the class for each test relative to other test areas. The NPRs for the various scores are displayed in horizontal bars. The varying lengths of these bars permit identification of the stronger and weaker areas of achievement for this class.

The lower part of the report provides detailed information about skills in each test. The number of items for each skill, the average number attempted, the average percent correct for the class, and the average percent correct for students in this grade in the nation are reported. The difference between the percent correct for the class and the percent correct for students in the nation is displayed as a horizontal bar. These bars permit identification of skills that stand out as high or low when compared with similar groups in the nation.

BUILDING PERFORMANCE PROFILE

Iowa Tests of Basic Skills® (ITBS®)

Building: High Pointe Elms 057904104
 System: Cedar Hill I S D 57904
 Form/Level: C/ 6
 Test Date: 09/2010
 Norms: Fall 2005
 Order No.: 000461419
 Page: 1
 Grade: 1

In the upper left part of this report, averages are printed for the tests, totals, or composite. Several types of scores are reported, including the national percentile rank (NPR), which is the percent of students in this grade in the nation with a lower score on that test, total, or composite.

The graph to the right of the scores provides a visual display of the performance of the building for each test relative to other test areas. The NPRs for the various scores are displayed in horizontal bars. The varying lengths of these bars permit identification of the stronger and weaker areas of achievement for this building.

The lower part of the report provides detailed information about skills in each test. The number of items for each skill, the average number attempted, the average percent correct for the building, and the average percent correct for students in this grade in the nation are reported. The difference between the percent correct for the building and the percent correct for students in the nation is displayed as a horizontal bar. These bars permit identification of skills that stand out as high or low when compared with similar groups in the nation.

 Grade: K

In the upper left part of this report, averages are printed for the tests, totals, or composite. Several types of scores are reported, including the national percentile rank (NPR), which is the percent of students in this grade in the nation with a lower score on that test, total, or composite.

The graph to the right of the scores provides a visual display of the performance of the class for each test relative to other test areas. The NPRs for the various scores are displayed in horizontal bars. The varying lengths of these bars permit identification of the stronger and weaker areas of achievement for this class.

The lower part of the report provides detailed information about skills in each test. The number of items for each skill, the average number attempted, the average percent correct for the class, and the average percent correct for students in this grade in the nation are reported. The difference between the percent correct for the class and the percent correct for students in the nation is displayed as a horizontal bar. These bars permit identification of skills that stand out as high or low when compared with similar groups in the nation.

BUILDING PERFORMANCE PROFILE

Iowa Tests of Basic Skills® (ITBS®)

Form/Level: CI 6
 Test Date: 09/2010
 Norms: Fall 2005
 Order No.: 000461419
 Page: 1
 Grade: 1

In the upper left part of this report, averages are printed for the tests, totals, or composite. Several types of scores are reported, including the national percentile rank (NPR), which is the percent of students in this grade in the nation with a lower score on that test, total, or composite.

The graph to the right of the scores provides a visual display of the performance of the building for each test relative to other test areas. The NPPs for the various scores are displayed in horizontal bars. The varying lengths of these bars permit identification of the stronger and weaker areas of achievement for this building.

The lower part of the report provides detailed information about skills in each test. The number of items for each skill, the average number attempted, the average percent correct for the building, and the average percent correct for students in this grade in the nation are reported. The difference between the percent correct for the building and the percent correct for students in the nation is displayed as a horizontal bar. These bars permit identification of skills that stand out as high or low when compared with similar groups in the nation.

BUILDING PERFORMANCE PROFILE

Iowa Tests of Basic Skills® (ITBS®)

Form/Level: CI 7
 Test Date: 09/2010
 Norms: Fall 2005
 Order No.: 000461419
 Page: 2 Grade: 2

In the upper left part of this report, averages are printed for the tests, totals, or composite. Several types of scores are reported, including the national percentile rank (NPR), which is the percent of students in this grade in the nation with a lower score on that test, total, or composite.

The graph to the right of the scores provides a visual display of the performance of the building for each test relative to other test areas. The NPRs for the various scores are displayed in horizontal bars. The varying lengths of these bars permit identification of the stronger and weaker areas of achievement for this building.

The lower part of the report provides detailed information about skills in each test. The number of items for each skill, the average number attempted, the average percent correct for the building, and the average percent correct for students in this grade in the nation are reported. The difference between the percent correct for the building and the percent correct for students in the nation is displayed as a horizontal bar. These bars permit identification of skills that stand out as high or low when compared with similar groups in the nation.
