

***Summary of Instructional Improvements
Mineola Elementary School***

***(Report Summary)
June 2014***

Mineola Elementary School has approached 21st Century Learning as a process of transformation rather than simply change. This process responds to the needs of students and the demands society makes on them.

The teachers and staff at MES began the process through Professional Learning Communities in which members studied research and data to make decisions. A summary of this process resulted in our campus wide Reading Initiative.

The following areas will be addressed in the elementary presentation:

- 1. Professional Learning Communities**
- 2. Data Driven Lesson Planning**
- 3. Reading Initiative**
- 4. Student Development and Leadership**
- 5. Restructuring the School Day**
- 6. Restructuring Response to Intervention (RTI)**
- 7. Changing Paradigms (in our own words)**
