Technology Report

October, 2011

This month in technology we have assisted many teachers with printer settings, program installs, computer troubleshooting, etc. We have also worked on the following projects:

- Updating Mimio software throughout the district.
- Installing and training of Education City at OES
- Updating and training teachers on Project Share.
- Assisting reading teachers at OES with Read Naturally installs.
- Time Clock Issues and updates.
- Updating and maintaining web page including information about redistricting, and creating a technology webpage that continually updates helpful links and information for faculty and the community.
- Assisting the District Testing Coordinator with DMAC setup and hardware and scanning issues.
- Renewing district annual Microsoft School License and contract.
- Assisting Ms. Carrasco in the move from OES to OHS Secretary
- Getting second serving line set up at OHS Cafeteria.
- Vernier hardware and software install at OHS for Science.
- Gathering information for lease/purchase of computers and equipment for teachers and students.
- Attending several trainings on integrating ipads and personal digital devices on our network and access to our servers.
- Setting up district wide student polling with Einstruction "clicker" devices and Which includes Mobi interactive tablets and each core teacher receiving ExamView software and member account to CPS online.
- Working with Ms. Clayton at OMS training on library and the marquee software.
- IP Phones for each classroom at OMS and OHS have arrived and we are in the process of installing those in classrooms.
- Assist with Distance Learning for dual credit students and scheduling distance learning opportunities with teachers and students.

We continue to support teachers and students in questions and technology training issues.
