Subject: 2024-2025 State Assessment Results

MISD Board of Trustees: September 16, 2025

Agenda Item – 7D

Background Information

The Texas Education Agency (TEA) released STAAR results for High School students in late May and early June for 3rd - 8th-grade students. District and campus administrators, along with teachers and professional staff, disaggregated data throughout the summer to create plans for professional learning for teachers and plans for instruction that support individual student needs on our campuses. This data has shaped the development of our district and campus improvement plans. We have many celebrations this year, but also areas of growth. In the 2025-2026 school year, we are specifically targeting middle grades math and social studies as an area of focus.

The slides present a three-year view, which is the same amount of time students have taken the STAAR 2.0 version of the test. Data is disaggregated by subject, grade, and performance band. Midway continues to perform above the state and region in all subjects. We saw modest gains in most areas, but are excited to see gains in the Masters area of performance in many subjects this year.

Fiscal implications
