

**Board Meeting Date:** 8/22/2023

**Title:** District Capacity Study – 2023

**Type:** Discussion

**Presenter(s):** Mert Woodard, Director, Finance & Operations; Wold Architects & Engineers

**Description:** Due to changes to the District's class size philosophy, programmatic changes, changes in administration, building construction and reconfiguration, and other factors, the *functional capacity* of the District's facilities have changed over time. In the Spring of 2023, the District engaged its appointed architectural firm to conduct a renewed capacity study for each of the District's buildings. The study is the first step in aiding the School Board, the administration, and District stakeholders to understand the current utilization, limitations, and possible future improvements to District facilities.

**Recommendation:** There is no recommended action.

**Desired Outcomes from the Board:** Review the enclosed capacity study presentation and prepare for discussion.
