

Site Report – Perryville - March 2021

**To: Superintendent Ty Mase
and LPSSD School Board Members**

From: Rob Fagerquist Principal/Teacher

Outstanding Activities and Events

March began with a well-deserved week off for Spring Break. Afterward, we picked up where we left off in February with our students working hard to finish their levels. Many writing prompts and end-of-level tests have since been completed or are still in progress.

Later in the month, BBNAHC personnel administered vaccinations using our gym as a staging area. While this was the second shot for most of the adult community, it was the first immunization for the teaching staff. We were not on the “list” for the first go-round, but that has been corrected and we expect our second shot in mid-April.

Two of our students, Destiny Nusbaum and Clifford Phillips, attended the virtual ANSEP computer build program, assisted by Megan Maloney. The build went well, and now the students are proud owners of brand new desktop computers.

To make things interesting, the Veniaminof volcano began rumbling in March. Thankfully, we were largely spared the ash, though we did get a few interesting light shows at night.

Several of our students are in the middle of CTE courses, to include Medical Terminology and Small Engine Repair.

By the end of the month, students were beginning to take advantage of the Outschool stipend to attend fun and interesting classes - learning about everything from American Sign Language to Drawing to Criminology.

Personnel

Our staff is gearing up for the state testing in April. Otherwise, all is well.

Standards Based System/Curriculum Progress

We are starting to finish off levels. All our hard work - staff and students alike - is paying dividends and we are looking to finish out the year with good progress overall.

Technology Progress

No problems to report with our technology. We received our brand new iPads this month and they have been configured and distributed

Facility Update

No changes to our facility this month. Our facility remains clean, dry, and serviceable.

LSAC Activity

We met on March 16th and discussed graduation plans, PEAKS testing, and our Open Gym schedule.

Volunteer Report

No volunteers at this point as access to the school is restricted.

Professional Development

All PEAKS training was completed this month and we are prepared for testing

Pupil Attendance

Attendance is still strong. Other than when obliged to quarantine per community mandates, our students are present and on time.

Student and Staff Safety

Our COVID precautions remain effective

Subsistence Calendar

We enter the final month of school in good shape to graduate four students and to have the remainder of our student body show
