RE: Therapeutic Day School Transportation

I am recommending a transportation change for one of our students who currently attends a therapeutic day school.

The day school team and parents inquired about the possibility of having this student transported on a District 91 vehicle. The reason for the request is because the student was experiencing significant challenges on the Lakeview vehicle that previously provided transportation to and from the therapeutic day school.

Members of the day school team stated that a vehicle change would allow the student to be transported with familiar peers from District 91 who attend the same school. Additionally, the bus driver is experienced and would understand the needs of the student.

Thank you for considering this request. I am happy to provide more information about this situation if needed.
