

Quanah ISD

Technology Report

For the April 2017 School Board

The QISD Technology director responded to 45 calls for assistance since the last board meeting. I installed the march maintenance release to all 80 of our wireless access points, installed windows updates to our Windows servers and upgraded our apple server to the latest OS that was released recently. We have received an updated firewall from region 9 and have been configuring that for our network. I will be attending a technology directors conference at the end of the month.
