

ACCESS
GROWTH SUMMARY
**LAKE BLUFF ELEMENTARY
SCHOOL DISTRICT 65**

2024-2025 ACCESS Growth Summary

Purpose

The purpose of this report is to examine the growth and proficiency of students designated as English Language Learners in the District who took ACCESS during the 2024-2025 school year. Growth for students in the district was compared with historical growth trends of students across Illinois on ACCESS. The percentage of students who met the English language proficiency benchmark of a 4.8 performance level is also reported.

Method

The Illinois State ACCESS Benchmark Model was built using 2023 and 2024 ACCESS data from all students in Illinois. The model was built to reflect typical student growth in the state. With this model each student with ACCESS data from the previous school year was assigned a propensity score based on his or her historical language domain scores (listening, speaking, reading, writing). The propensity score indicates the expected achievement for that student during the 2024-2025 school year. To evaluate student growth, students' actual 2024-2025 ACCESS overall composite test scores were compared to the expected values provided by the prediction models.

Results

A growth score's deviation from zero indicates the degree to which a student outperformed or underperformed his or her projected scores. If growth is in the Expected range (green), then results indicate that group of students in your District grew at similar rates to other EL students across Illinois. If growth is Higher than Expected (blue), this indicates that group of students in your District grew at significantly higher rates compared to EL students across Illinois. If growth is Lower than Expected (yellow) or Unsatisfactory (red), then results indicate those students in your District grew at significantly lower rates than EL students across Illinois.
