

Roots & Branches

~ Community Early Learning Center ~

Summer “School’s Out”

I am currently working on staffing and summer programming for our school age kids that will be joining us throughout the summer in correlation with summer school. I plan to include our programming options with the summer school packets that already go home with our students. Providing care and enrichment programming in correlation with summer school will be a great community support and service to many of our families.

Site Visits!

Two other school districts have now contacted us to set up meetings and tours discussing the process of developing the childcare center in Frederic!

Everyone
Gains!

Fever Literally!

Attendance at Roots & Branches has been low straight across the board because of reoccurring illness throughout the center. This will be something to consider in the future when planning tuition rates. With that being said, I have started working on running numbers to compare our incoming tuition and cost of staff. This will be a low average because of the number of drop-in families we serve. My hope is that our drop-in care balances the days our regular families are out with illness and vacations.
