2020-21 Enrollment Fall vs. Spring

- Historically, the district's K-12 enrollment decreases from October 1 to June 1.
- Most of the enrollment drops happen in grades 9-12.
- 2020-21 was an unusual year for starting and ending student numbers. Unlike other years, students continued to enroll in school as the Covid-19 Pandemic allowed for consistent in person classroom instruction later in the school year.

Enrollment Projection Data

Enrollment Projection Data

- The district uses a combination of results from multiple enrollment projection models.
- The models allows schools to develop enrollment projections based on three different sets of data:
 - October 1st MARSS submission
 - End of Year ADM is generally used for financial forecast
 - □ **District Data** allows schools to enter enrollment history taken at any time, resident ADM or any other historical data by grade

Kindergarten Projection Methods

- Hold constant maintains the 2021-22 kindergarten level.
- **Linear projection** is a straightforward mathematical projection based on nothing more than the past five years of data.
- County birth method uses the total number of live births in Wright County and examines what percentage of those births enroll in kindergarten. The projection is based on the average percentage of the last four years.
- **District-determined method** examines county birth rates in Wright County and compares that to actual student enrollment numbers in the District and projects that percentage for the next five years.

Enrollment Projection Methods

- After the kindergarten enrollment projection is complete, the overall K-12 enrollment is determined by a variety of methods:
 - □ Cohort Survival Method
 - Weighted Cohort Survival Method
 - Numerical Survival Method
 - Weighted Numerical Survival Method
 - ☐ Merged Method
- Due to the COVID pandemic, the enrollment projection results vary noticeably depending on how many years of historic data is used. The 2019-20 and 2020-21 were not normal and the student variances did not follow prior year trends.

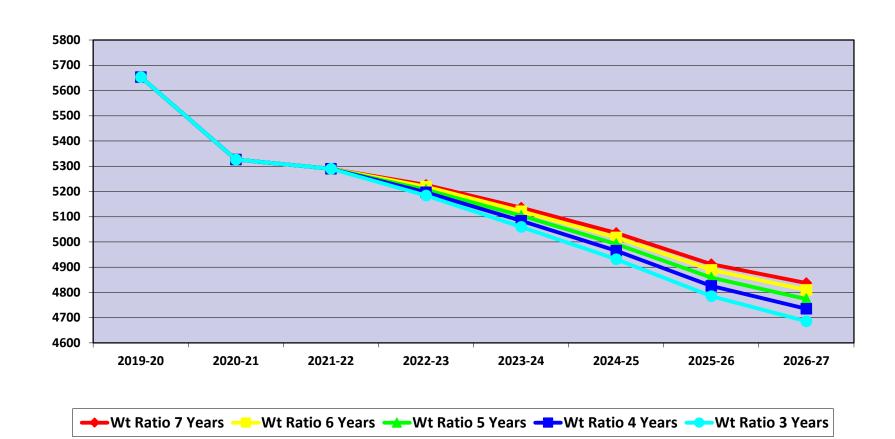

Projection Methods Comparison

- Using Oct. 1st district data, eighteen different variations were examined.
- The following five were selected for detailed analysis:
