

PUTNAM COUNTY COMMUNITY UNIT SCHOOL DISTRICT #535

Information for the Board of Education

Meeting: October 21st, 2025

Item: District Facilities Planning (Discussion)

Information:

- *PCJH Sidewalk and Drainage Repairs* – These repairs are being completed this week.
- *Pavement Updates* - Pavement Maintenance Services from Henry looked at the parking lots and drives at PCJH and said they would not tar-and-chip them because the lots were previously sealed. They shared that they attempted the work on a regional parking lot, and it quickly degraded away.
 - We requested a quote for replacement of lots to get a better understanding of costs. At PCJH, a two-inch overlay of all lots and drives, except for the south drive, and lot is \$84,500.00. At PCHS, a two-inch grind and overlay of the entire lot along with asphalt around the maintenance shed is \$245,000.00.
 - Considering the PCJH drainage repairs as well as the potential construction on the wastewater treatment plant, it may be best to consider both PCJH and PCHS lots for replacement after finalizing those projects or as late as Summer 2027.
- *PCHS Parking Lot Lights* – We met with Ameren last week for a preliminary review of the parking lot. They are going to send out a lighting specialist and provide a quote to add more lights to the parking lot.
