Quanah ISD

Technology Report

For the August 2018 School Board Meeting

The busy summer work schedule in the tech department continues as we are now three weeks from the start of school. New staff In-service begins later this week and I will be discussing how to check district email and use of district technology. The process of assigning the graduating senior chromebooks to the incoming freshman students will take place in the next few weeks. The process of rebuilding the high school and jr. high computer lab software images with the latest OSX and Microsoft Windows updates so they will be ready for school to resume in the fall. I have also prepared laptops for our new teachers.
