

# April Maintenance Board Report

As we approach warmer weather, I'd like to report that our Maintenance, Grounds, and Custodian teams have been performing well in preparing our buildings and grounds for the season ahead. Below are key highlights of their efforts:

## 1. Maintenance Department:

The Maintenance team has done an outstanding job getting our buildings ready for the warmer weather.

- **Cooling Tower Start-Up:** At the high school, the team has successfully started up the cooling tower. This is a critical task to ensure that our HVAC systems are fully operational for the upcoming hot months.
- **Fire Inspections:** As part of our spring maintenance, the team conducted fire inspections at all locations during spring break. The inspections went very smoothly, with no major issues. This ensures that all of our facilities are in compliance with safety regulations.

## 3. Grounds Department:

The Grounds team has done an **excellent job** preparing for the irrigation and mowing season. They have successfully:

- **Irrigation Systems:** Ensured that our irrigation systems are up and running, keeping our landscaping healthy as we enter the warmer months.
- **Mowing:** They have kicked off the mowing season early and have been maintaining our grounds, ensuring our schools look well-kept.

## 4. Custodial Department:

The Custodial team has also performed deep cleaning. Over spring break, they have ensured that all our schools are clean and ready for the return of students and staff. Their attention to detail and dedication to maintaining a clean, safe, and welcoming environment for our school is greatly appreciated.
