Re: A/C Installation at Auto and Wood Shops

I would like to discuss the purchase and installation of HVAC units for the wood shop at Churchill High School, wood shop at Franklin High School, auto and wood shops at Stevenson High School, and the construction trades and auto shop at LCTC at the next Committee of the Whole on Tuesday, January 21, 2025.

We are recommending the purchase and installation of this project to be awarded to Quality Aire Systems, located in Whitmore Lake, Michigan, as the low responsible bidder for a cost of \$1,251,018. We had three bid proposals and the company with the lowest total cost pulled their bid due to it having an error. Quality Aire Systems has successfully completed multiple projects in the past in LPS and we have a good working relationship with the company. The source of funds for this project will be the district's Sinking Fund.

Please add this item to the January 21, 2025 Committee of the Whole Special Meeting.
