(C) **Funding source: Identify the source of funds if any are required.**

(D) **Clarification: Explain any question or issues that might be raised regarding this item.**

July 13, 2013

Mr. Gonzalez
1420 Eidson Rd.
Eagle Pass, Texas 78852

Mr. Gonzalez:

As per your request, Mr. Chavez, Public Works Director, researched the information previously given to Mr. Farias.

The original estimate was for \$21,645; however this was for 400 lineal feet instead of the 600 required. Also, at the time of the original offer, the city had available recycled materials which it planned to use as base material. This base material is no longer available and as such the school will need to pay for it. (900 tons).

Estimate without plans:

250	Tons of HMAC	\$21,250
900	Tons of Base Material at 7.50	\$ 6,750
1,202	Lineal feet of Curb & Gutter	\$ 9,616
2,400	Sq. Ft of Sidewalk	\$ 6,180
Total		\$43,796

Other Issues that may need to be addressed:

1. Storm Drains may need to be installed. Your engineer will need to determine if the existing drainage system can handle the run-off or if additional storm boxes will be needed.
2. The existing pavement on the side of the Jr. High is only 22 feet wide. It is Mr. Chavez recommendation, based on his experience, that this be widened to match the street or at least to 24 ft. ***(This would be an additional 601 lineal feet that would need to be widened. If done, this would require the relocation on an existing box culvert.)***
3. *However, if police, fire and your own transportation system and engineer are ok with the existing road, public works will accept the recommendations*

If you any questions please contact Mr. Hector Chavez at 773-9408, or you may also contact me at 773-1111.

Respectfully,

A handwritten signature in blue ink that reads "Gloria Barrientos".
