From: Lisa Abbey, Director of Business Services

Re: Storage Buildings

We would like to discuss adding storage buildings at six buildings at the Building and Site Committee Meeting on November 4, 2013. The Administrator of Operations, Ray Raymond attended the Building and Site Sub-Committee Meeting on October 28, 2013 to discuss the need to add external storage to these schools. Mr. Raymond indicated that any equipment that uses gasoline or other flammable materials should be stored outside the school building for safety purposes. Currently, this equipment is stored inside the building.

Attached please find additional detailed information from Maintenance Supervisor Ray Irvine. Please note we are looking for consensus to move forward with the required architecture drawings and State of Michigan approval before bidding the project. Bid responses would be brought to the Board of Education at a future date for consideration. Please include this item on the agenda. Thank you.

### **MAINTENANCE DEPARTMENT**

DATE: October 28, 2013

TO: Ray Raymond, Administrator of Operations

FROM: Raymond Irvine, Maintenance Supervisor

SUBJECT: New Equipment Storage Buildings at 6 Schools

We need to have Six (6) new Outside Equipment Storage Buildings erected at the following schools: Cass, Cleveland, Hoover, Kennedy, Perrinville, and Rosedale. We have a quote for six (6) Easi-Set Precast Concrete Buildings. These buildings would be 12'-6" X 12'-6" by 8'-8" high. The quote is for \$13,300.00 each and we would still have to pour foundations and a slab up to the doors at an additional cost of approximately \$1,500.00 each for a total of \$14,800.00 for each shed. Total cost for buildings is approximately \$88,800.00.

If we have the same size buildings constructed on site the estimated cost will be approximately \$10,500.00 each. These buildings would be with concrete foundations, cement block walls, and conventional wood rafters with standing seam metal roofs. Total cost for buildings is approximately \$63,000.00.

Both of these projects would require Architect drawings and State of Michigan approval and then sent out to bid.
