Date: May 7, 2019
Re: Course Eliminations – Social Science

I respectfully recommend the elimination of the following two Social Science elective courses:

- Western Civilization
- American National Government PSCI 101

Both of these courses are being recommended for elimination due to low enrollment because of the numerous courses available to students in this area of study. Neither course has run for several years.

These course eliminations were discussed and approved by the Curriculum Coordinating Council and are endorsed by Administrative Council.

Thank you and please let me know if you have further questions.
