Please describe the steps you have taken to collect the data responsive to these questions and the timing of any data collections or needs assessments you conducted that inform your answers to these questions.

Using district data and the current inventory of models at the time of the pandemic, the district identified 270 students in the 3rd and 4th grades that would not have sufficient access to devices. These students needed a connected device that was secure and viable, supporting all district educational applications and needs for remote learning or for after school homework completion. This was determined after the teardown of previously shared devices which were prevalent in the Primary and Intermediate grade levels. As the district followed stringent IDPH and CDC guidelines, we realized that we could not loan these or share devices between students in fear of a pandemic breakout. Devices were ordered for the students, but due to a lack of commitment from various vendors, these devices were constantly being pushed back. Eventually once the supply chains cleared up, the district was able to reorder these devices and receive them for instruction this past summer for remote learning.
