Re: HVAC Repair Stevenson

I would like an opportunity to share at the December 9, 2024 Committee of the Whole meeting information on an HVAC equipment repair for Stevenson High School. The two pumps in the cooling tower at Stevenson are beginning to fail. This cooling tower delivers air conditioning to a large portion of the building such as the cafeterias, counseling office, band room, and other spaces in the western portion of the building.

Carl Roberts, Supervisor of Maintenance, elicited quotes for parts and labor for this project. We are recommending Systemp Corporation, in Rochester Hills, Michigan as the low responsible bidder with a bid of \$59,822.37. While there was a company with a lower total dollar quote, this company listed several exclusions and did not do a site visit prior to quoting the project. Systemp is a company that has completed many successful projects in the district. This project will be funded through the Sinking fund.

Please include this item on the agenda. Thank you.
