

**TRANSPORTATION BOARD REPORT FOR
JANUARY 2026**

SUBMITTED BY: WAYNE BULL Calf

Hi all this is my January board report.

So, for the mechanic shop, this goes back to December since I didn't have the opportunity to report, first of all of our buses passed inspection, which took about 2 weeks of preparation to achieve, but in that time to date, they completed 53 workorders, to mention a few tire changes, several oil changes of most buses and vehicles, they have had us put out on emails to send in all vehicles work orders, and not come down to the shop and telling them what is needed, so your work request is remembered, there is to many verbal request that cannot be done due to no work request, we had purchase a motor for one of our trucks, installed the motor and turned out to be defected so waiting on a replacement.

As for the office, we sent our bus inspections to OPI, trying to learn the clock and getting bills paid.

For the trip personal department, we had 52 trips mostly sports, were getting ready for another busy 2 months.

As For the disciplinary department, we had 45 wright ups, with 11 removals, this month, we started bringing our robotic bus around to all the school whom requested it to explain all of our bus behavior rules, January was the first response or request that we received, from any school, for this much needed event.

This is my December-January report thanks for reading God bless.
