

TRANSPORTATION BOARD REPORT FOR DECEMBER 2024

SUBMITTED BY: WAYNE BULL CALF

Hi all this is transportations December board report.

So as for the shop, they have completed about 59 work orders, with buses and district vehicles. Which were lot of tire changes, heater repair, wind shield wiper repair and brake shoe replacements. It also felt good to plow and sand for a day or so around school grounds. We have our December annual bus inspection on 12/16/24 at 9:30 am. The shop is urging all departments whom have a district vehicle to keep watchful eyes and ears on any signs of troubles while operating the vehicles so we don't have any manger break downs. Also help keep all vehicles clean while in the user's care. We found security a nice low milled jeep.

So, for the trip personal, we only had 35 trips which is a good break before the next upcoming sporting season. I have been searching for another team bus, at the moment we have 3 team buses available one is a 41 passenger, one is a 48 passenger these two buses are very reliable. Then there's the 2 MCI buses, one of them has been at AL's diesel shop for about a year and a half and the other MCIs has been in and out of the shop and is not very reliable so I am searching for another charter bus.

So, for the disciplinary department, they have been busy with 75 write ups with 12 removals. We are in need of bus monitors to help with bus controls we did get one monitor from maintenance which made a world of difference. Thank you, Kyle Coursey.

This is my December report, thanks for reading God bless u all.
