

Nature Center

Modeling Service Learning and the 40 Assets Training programs, the Kiwanis Club of Coppel has initiated a student-run project to develop a nature center in Coppel. Groups of students from each middle school and the high school have met in various subcommittees to investigate sites, features, marketing and finances needed for this project. A student group will be presenting the project to the City Council on May 24th. In advance of this presentation, Michael Holzheimer from CHS will be presenting an overview of the project to the CISD school board.
