

### FACILITIES PLANNING

The Board of Education recognizes that careful, prudent planning is essential to the efficient operation of the schools and that planning must be grounded on accurate data. In order to assure that future District construction supports the educational program and responds to community needs, the Board will prepare a capital construction plan and will revise that plan periodically thereafter. The plan shall include a thorough description and analysis of local and regional demographic factors which influence general population growth and public school enrollments.

The plan will be reviewed by the Facility Task Force.

In planning for the enlargement or modification of its facilities, the Board shall consider not only the number of children whose educational needs must be met, but also the physical requirements of the program it deems best suited to meet those needs. Each school building and site shall provide suitable accommodations to carry out the educational program of the school including provision for the disabled, pursuant to law and regulation.
