Early Childhood Family Education (ECFE) is a program for all Minnesota's families with children between the ages of birth to kindergarten entrance. The program is offered through Minnesota public school districts. ECFE is based on the idea that the family provides a child's first and most significant learning environment and parents are a child's first and most important teachers. ECFE works to strengthen families. The goal of ECFE is to enhance the ability of all parents and other family members to provide the best possible environment for their child's learning and growth. ECFE is funded through state aid, local levy, and participant fees.
